Personal Summary

With over 5 years of experience as an Android Developer, I have a deep understanding of the Android platform and its development ecosystem. One of my key strengths is my ability to collaborate effectively with cross-functional teams, and I am a proactive communicator who is always looking for ways to improve the development process and create a positive team environment. Recently, I have been studying Flutter and have gained knowledge in cross-platform mobile app development. I am also fluent in Spanish and have a high level of proficiency in English.

Career History

Senior Mobile Developer @ XP Inc

October, 2021 ~ February, 2024 | Remote - BRAZIL

- XP Inc is a Brazilian fintech that provides a range of financial services. Currently I work in the area of investment brokerage, where clients are allowed to invest in a wide range of financial instruments such as stocks, bonds, derivatives, and foreign currencies
- I collaborate with an experienced team comprising product managers, designers, and other developers to guarantee expectations of stakeholders.
- Over the past year, I have been engaged as a Flutter developer as the company undergoes a migration of its application to a different technology.

Technologies: *Kotlin, MVVM Architecture, Android Studio, Google Firebase and Crashlytics, AzureFlutter, Scrum, SSE Connection, Unit tests, Flutter development*

Mid Level Android Developer @ Omnichat

November, 2015 ~ October, 2016 | Curitiba - BRAZIL

- Omnichat is a company specializing in chat-related e-commerce that help companies to offer a better experience selling their products by e.g: whatsapp.
- I took on the responsibility of building an Android app from scratch during the initial stages of their startup. As a result, I had the autonomy to make decisions regarding the selection of APIs, frameworks, and define the architecture for the app.

Technologies: *Java, Android Studio, Firebase distribution, MVP Architecture, SQLite, Websocket connection, Firestore*

Mid Level Android Developer @ Snowman Labs

June, 2015 ~ October, 2015 | Curitiba - BRAZIL

- It is a software house based in Brazil. They provide end-to-end services, including app design, development, testing, and maintaining apps. They create user-friendly applications that meet their customers' specifications.
- During that time, I was involved in various stages of the project, starting from analyzing customer requirements and proceeding to prototyping and system development.

Technologies: *Java, Android Studio, MVP Architecture, SQLite, Restfull connection, Firestore and Firebase*

Junior to Mid Level Android Developer @ Totvs

February, 2014 ~ May, 2015 | Joinville - BRAZIL

- It is a Brazilian multinational software company that specializes in the development and implementation of ERP (enterprise resource planning) software solutions. They are one of the largest software companies in Latin America
- At Totvs, We were a small mobile team responsible for managing their business process management app. Our first goal as a team was to release the new app and fix bugs of legacy code.

Technologies: *Java, Android Studio, MVP Architecture, SQLite, Restfull connection, Firestore and Firebase, Kanban methodology, Pair programming*

Intern to Junior Developer @ Softin Sistemas

May, 2012 ~ January, 2014 | Joinville - BRAZIL

- It is a Brazilian company that specializes in providing solutions for technical assistance and service network management.
- In the initial phase, as trainee, my role was to develop and improve their web tool with .NET C# focusing on TDD for managing and optimizing technical support and service networks.
- Later, I was assigned to develop a new Android app for technicians. This app helps them to manage the progress, execution, and location of their services.

Technologies: Java, C#, .NET, Silverlight, Eclipse, Visual Studio, Scrum, Pair Programming, TDD
